Clostridium chauvoei Flagella-specific Rabbit Polyclonal Antibody (detection antibody) - Lot ID IRP 440

Document Number: CVB-DAT-0038

Revision: 02

Previous Number: BB DAT0045.06

Vault: CVB-Released

Section/Area: CVB-DAT

Effective Date: 24 May 2021

Notes: *Strain or Source: N/A, Fill date: March 1998*

**United States Department of Agriculture

P. O. Box 844
Ames, IA 50010**

1. **Reagent Name:** *Clostridium chauvoei* Flagella-specific Rabbit Polyclonal Antibody (detection antibody)
2. **Strain or Source:** Not applicable
3. **Lot Number:** IRP 440
4. **Fill Date:** March 1998
5. **Expiration Date:** March 31, 2022

Precautions: There are no known hazards associated with the use of this reagent.

6. **Intended Use:** IRP 440 is for use in a capture enzyme-linked immunosorbent assay (ELISA) as described in the **BBPRO0220** for potency testing of *C. chauvoei* bacterins.
7. **Instructions for Use:** The detection antibody is provided undiluted in 20 µL amounts. For use in the ELISA, IRP 440 should be diluted approximately 1:20,000 in blocking solution/reagent diluent. For detailed instructions see [CVB-PRO-0005](#).

8. Test of Reagent:

Checkerboard ELISA – Tests were conducted to determine the optimum dilution of reagent. The specificity of the detection antibody was demonstrated by ELISA using purified *C. chauvoei* flagella and whole cell antigens of *Clostridium septicum*, *Clostridium perfringens*, and other clostridial species.

Sterility test – This reagent was tested for sterility and found to be free of viable bacteria and fungi.

9. **Container Size, Type, Weight, or Volume:** 20 µL aliquots in plastic vials.
10. **Storage Conditions:** Store at -20°C or lower. Once the detection antibody has been thawed, store at 2°- 7°C.
11. **CVB Technical Contact:** Bacteriology Section, Center for Veterinary Biologics, (515) 337-7020 or FAX (515) 337-7673.

12. Origin and Passage History: Not applicable.

13. Method of Preparation: Polyclonal rabbit antiserum (detection antibody) was collected from rabbits hyper-immunized with purified *C. chauvoei* flagella. The detection antibody was absorbed with *Clostridium septicum* spores, centrifuged, filtered, and frozen at -70°C or lower.

14. Other: None

Reagent orders and feedback should be sent *including phone number* to the following email address: VS.DB.CVB.Reagent.Requests@usda.gov

Reagent orders forms (APHIS Form 2018) can be found on the CVB website.
